THE PROBLEM

Sustainability Today is Broken

Fragmented

Data scattered across
spreadsheets & siloed tools

Manual

Teams spend 60% of their
time collecting data

Expensive

Avg. \$2.4M/year in
ESG compliance costs

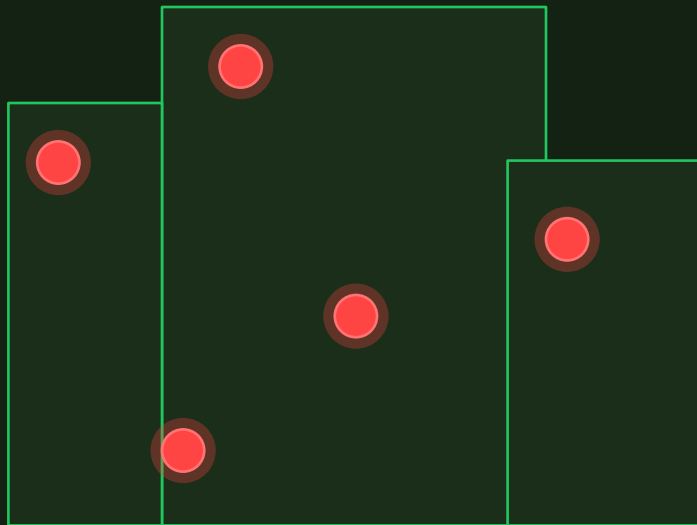

Reactive

Problems discovered
after damage is done

Companies are overwhelmed by ESG requirements and operational waste but lack intelligent systems.

Waste is Hiding Everywhere

Waste Hotspots →

Wasted Electricity

THE SOLUTION

Introducing EcoProfit AI

AI-powered sustainability intelligence for operational efficiency and ESG visibility.

RESULTS DASHBOARD

NovaFoods Logistics sustainability intelligence

NovaFoods Logistics could reduce monthly operational costs by approximately EUR 18,400 by optimizing warehouse energy usage, consolidating delivery routes, and reducing supplier packaging waste.

View
Recommendations →

AI Document Analysis

Analyze invoices, utility bills, receipts, and operational spreadsheets automatically.

Operational Waste Detection

Identify inefficiencies, emissions drivers, and hidden cost leakages across operations.

Sustainability Dashboard

Visualize savings opportunities, sustainability metrics, and operational insights.

ESG-Ready Reporting

Generate executive sustainability summaries and compliance-ready exports.

AI Recommendations

Receive actionable optimization suggestions powered by operational data analysis.

Future Monitoring Layer

Future-ready architecture for sensors, live monitoring, and real-time sustainability intelligence.

"The MVP transforms operational documents into sustainability intelligence."

HOW IT WORKS

From Raw Data to Intelligent Action

01

Connect

- ✓ Utility bills
- ✓ Receipts
- ✓ Invoices
- ✓ Operational spreadsheets

02

Analyze

- ✓ AI reads documents
- ✓ Estimates emissions
- ✓ Detects operational waste
- ✓ Finds savings opportunities

03

Optimize

- ✓ AI sustainability analysis
- ✓ Cost-saving recommendations
- ✓ ESG-ready summaries
- ✓ Estimated footprint

Upload data. Generate insights. Identify savings.

Why **EcoProfit AI Wins**

01

Software-First Entry Point

Companies can start with existing operational documents — no expensive infrastructure required.

02

AI Turns Fragmented Data Into Intelligence

EcoProfit AI transforms invoices, bills, and operational records into actionable sustainability insights.

03

Built for Operational Efficiency

The platform focuses on measurable savings and operational visibility — not just ESG compliance.

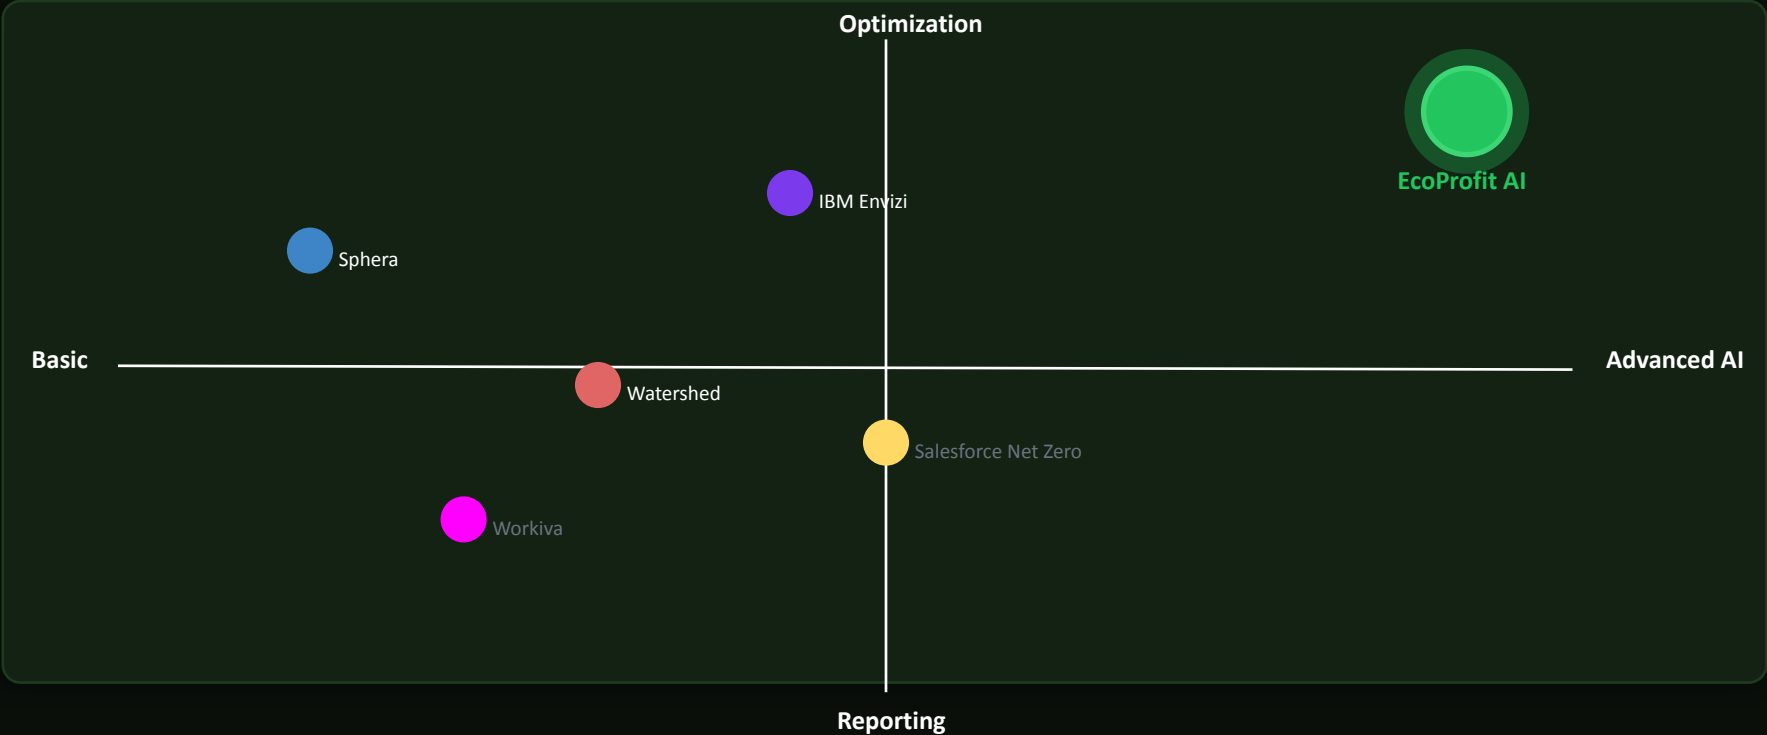

04

Infrastructure-Ready Vision

The MVP begins with document intelligence and evolves toward real-time monitoring and smart operations.

"EcoProfit AI combines low-friction adoption with long-term infrastructure potential. "

COMPETITIVE LANDSCAPE

SaaS — Pricing

MOST POPULAR

Starter

From \$299/mo

- ✓ AI sustainability analysis
- ✓ Document processing
- ✓ Basic ESG reports
- ✓ AI generated recommendations

Growth

From \$899/mo

- ✓ Multi-facility tracking
- ✓ Benchmarking & exports
- ✓ Full ESG automation
- ✓ Priority support

Enterprise

Custom

- ✓ Advanced operational analytics
- ✓ Custom sustainability reporting
- ✓ Pilot onboarding support
- ✓ Future API & sensor compatibility

Average contract value: \$28K ARR • NRR target: 130% • Payback period: < 6 months

Phased Rollout Strategy

MVP STAGE

NEXT BUILD

LONG-TERM PLATFORM

AI Sustainability Analyzer

DOCS + AI ANALYSIS

- Upload documents
- Generate insights
- Estimate emissions
- Identify savings
- Validate business value

Transform operational data into sustainability insights.

Live operational dashboards

SENSORS + LIVE DASHBOARDS

- IoT integrations
- Real-time monitoring
- Operational benchmarking
- Predictive alerts
- Live operational dashboards

Enable real-time sustainability visibility.

AI-enabled infrastructure

AI-ENABLED INFRASTRUCTURE

- Sensors implementation
- Automated ESG workflows
- Predictive optimization
- Autonomous efficiency management
- Sustainability operating system

Build the operating system for sustainable companies.

FUNDING

We Are Raising €350K Pre-Seed

To refine the MVP, validate pilot programs, and prepare the first sensor-enabled integrations.

Use of Funds

MVP Refinement & AI Engine 35%

Customer Pilots & Validation 25%

Document Processing & Dashboards 20%

Sensor Integration Research 10%

Sales, Branding & Operations 10%

18-MONTH RUNWAY • MVP VALIDATION • PILOT-DRIVEN PRODUCT BUILD

What This Funding Unlocks

- AI Sustainability Intelligence
- Pilot-Driven Validation
- Operational Intelligence Layer
- Future-Ready Infrastructure

12-Month Goals

- ✓ Test pricing and customer demand
- ✓ Refine and improve AI sustainability analyzer
- ✓ Enable first real-time monitoring integrations
- ✓ Prepare EcoProfit AI for scalable enterprise growth
