DELIVERY

Current Challenges and Business Needs

Insights from client interviews

Current challenges

-  **1** Laura: 4–6 third-party quotes per day require manual checks.
-  **2** Delivery promises can slip from 7 to 12 days, around twice per year.
-  **3** Two key accounts have threatened to switch suppliers after unreliable promises.
-  **4** Marco: commitments, POs, and sourcing options are not visible in one place.

Business needs

-  Reliable promise dates
-  Faster quote turnaround
-  Clear auto-confirm vs human-review rules
-  End-to-end auditability
-  Consistent customer communication
-  Operational KPI visibility

The opportunity:

turn fragmented quoting into a **structured, auditable CTP process.**

THE SOLUTION

One system. A clear answer.

The GrainCraft CTP Agent evaluates your request in seconds and returns the best feasible option based on real operational constraints.

Checks stock, commitments and incoming POs

Evaluates standard, fast-track and air freight options

Recommends the best option by date and total cost

Auto-confirms or escalates for human review when needed

Delivery: 10 Jul 2026 € 1,894.00

1. Enter customer, SKU and quantity

2. CTP Agent evaluates feasible sourcing options

3. Get recommended option with date, cost and decision

4. Confirm and send customer communication

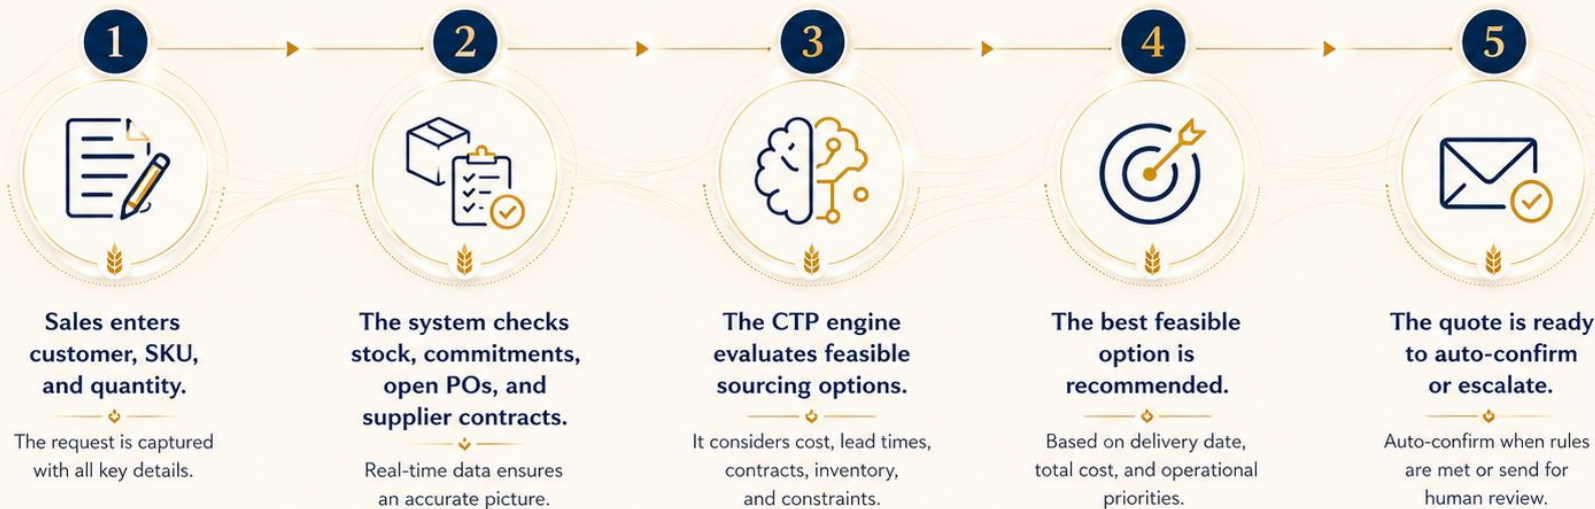

A single system to promise with confidence, every time.

Accurate. Traceable. Reliable.

Daily workflow

How a quote moves from request to recommendation.

Outcome: faster, more structured quotation handling.

Auto-confirm vs human review

Routine cases move automatically, while exceptions stay under control.

AUTO-CONFIRM

Routine. Efficient. Confident.

Routine cases are auto-confirmed

Within thresholds

No expedite sourcing

HUMAN REVIEW

Exceptions. Oversight. Control.

Fast-track

Air freight

Threshold deviation

Override

The system **automates** normal decisions and **escalates sensitive ones.**

Business value.

Why the solution matters operationally.

Our CTP Agent turns complexity into clarity—helping your team make the right promise, every time.

Prevents double-booking stock.
Checks availability and commitments in real time.

Avoids overpromising.
Recommends the best option based on real constraints.

Gives clear sourcing options.
Provides feasible choices with dates and total cost.

Creates commitments and decision records.
Logs commitments and captures decision history for accountability.

Generates email confirmations and drafts.
Sends confirmations and drafts to keep customers informed.

**Stronger promises.
Smarter operations.**

The result is a more **reliable** and **auditable** promise process.

Dashboard and control.

Operational visibility in one place.

Automation rate

Track the share of quotes handled without manual intervention.

Delivery accuracy

Monitor historical on-time vs late performance.

Stock coverage

Identify at-risk SKUs and days of coverage at a glance.
